

bio experimenting with petri dishes and bioreactors

ascende used one of this kits one could print out from the internet
he created for himself a novel input and display solution
at his hands and all his joints on his body he had tiny soft textile bands
weighing only 3 gramms each
into these bands were the sensors woven into what would allow the central
data processing unit to know the exact position of all moving parts of the
body
he had also a full body suit wearing about 200 gramms what allowed himself
to see his muscles and flesh in realtime

the compter being woven into a poach one could wear anywhere on ones body
with some small lightweight straps... as the computing unit itself was the
size of a small flat matchbox or a watch for example... on his head he wore
glasses what have been available since some times

with them he made photographs and movies on all the experiments petri
dishes bioreactor algae growing
also sometimes he took a glass filled with water to see trough it.... in
order to inform this water in his glass what he was experiencing happening
in his laboratory
or their lab as perma too was now part of his life

not long after perma moved in with ascende in paris to make sure he would
not waste the chameleon dna she so preciously got donated when she
meditated at the chamaeleon forest

not long and they were a romantically sexually active couple
she took him right into her mouth and sucked his sperm off to digest ...
and he was worshipping her vulva

in his laboratory
or their lab as perma too was now part of his life

not long after perma moved in with ascende in paris to make sure he would
not waste the chameleon dna she so preciously got donated when she
meditated at the chamaeleon forest

not long and they were a romantically sexually active couple
she took him right into her mouth and sucked his sperm off to digest ...
and he was worshipping her vulva with his broad tongue, flapping her
clitoris to make her squirt in his mouth

oh that was unintended kind of spontaneous erotic phrase....

to continue watching ascende and perma getting more and more into
synchronistic and love filled
flow...
it took some days of them spreading to love in the appartement while the
skin cells of perma and the chameleon would grow into each other

but it was done

now there were bioreactors carrying humanplant cells from ascendes line of
experiments and others carrying the perma and chameleon fusionated cells

2 weeks passed while they both were happy with each other and tending to
the petridishes bioreactors watching and nurturing their co-creations

they both were humble enough to acknowledge the whole creation and all of
its creators or the one...
to be the giving entity of the life force what fuelled the experiments
success
this was not their property although the source has allowed the person to
have a say with how the genes are being handled

30 minutes later
a has washed himself in the wild river, danced in the little sandpatches
laid himself again on the stones

where he saw in his mind how the human and plant cells grow together

drawing it rudimentarily

a walks home towards
when he thinks about how could there be a link
of the line of storytelling where they grew it into their very own bodies
at the pools

would it be acceptable for the reader to have ascende and perma bathing themselves with their cell creations ?

a tends towards yes, as it might be an important research field ...

the human and animal cells were fusing together nicely and were multiplying strongly
perma made herself a bath with where she enjoyed beautiful visualisations of molecular and microscopic levels how the new kind of cells were adding itself to her own skin

she only used a patch the size of a fingernail

the ability to see the synthesis of this tiny bit of new cells with her skin... came through her studying the microscope and smoking ganja with ascende with also eating psilocybin mushrooms from the darkchambers in ascende's appartement in paris

she had been eating psylos and eating as well as smoking marihuana also in her tropical permaculture hut

when she left the bathroom still baffled by the dreamlike insights she just got donated with

she told ascende about her success

listening to it, ascende wanted to try it to with his co-creation of human and plant skin functions...
and also him got the vision donated when he saw the 2cm² of new cells being fused into his body

happy on that success they went to bed to celebrate their reunions with the new cells

the next morning ascende saw a perma whose skin has blended in smoothly with the white of the cushions and the windowsheets

while himself noticing a warm nurturing sensation
when he opens the curtains to let sunshine on his skin

so... miraculously the properties of the new cells have speed delivered their capabilities to the old cells of the whole human body
an x-fold magnification of skin regrowing changing times
